

# Harmonized health impact and partnership metrics to accelerate knowledge sharing and utilization

## Investigative inquiry

- Systematic literature review
- Online survey
- Phone interviews

Three tools developed:

- Two thematically focused tools
- One partnership assessment tool

## Piloting solutions

- Two workshops in Canada
- Field testing in two LMICs

- Three tools refined and finalized

## Capacity building

- Capacity building activities

- Partnership assessment tool and harmonized metrics on specific WACH themes
- Transdisciplinary perspective emphasized
- All project activities and products in French and in English
- (enhancing harmonization among French and English global health workers)
- Benefits to universities and organizations working in global health
